

Cook UP Cool visuals With IMAGE CHEF

<http://www.imagechef.com>

Express your personal creativity instantly with Image Chef - an online image generator that allows users to create customized banners, buttons, signs, license plates, bling and a host of other graphics using pre-built templates that can be incorporated into a variety of projects (presentations, reports, newsletters, wikis & blogs). What a great way to grab the reader's attention! 😊

Your mission:

- Use Image Chef to create five graphics of your choice. One graphic must include a picture you have uploaded. (6 points)
- Create a wiki page entitled "Image Chef Graphics". (2 points)
- Embed the new images into your wiki page. Provide a title for each image indicating which template you used to create it. (10 points)
- Create a title for your page with one of the following generators: <http://cooltext.com> or <http://www.sparklee.com/~78u>. (2 points)

Check out my Multimedia wikispace at <http://batechj20.wikispaces.com> for an examples related to this project. 😊
